## CHAPTER XIV—(CONTINUED.)

[illegible]

## THE CARE OF MILK.

## THE CARE OF MILK.

BY H. H. DEAN, B. S. A., PROFESSOR  
DAIRY HESBANDRY AT ONTARIO AGRICULTURAL COLLEGE, GUELPH.

That the cheese and butter-makers must be able to make an A1 article of cheese and butter, it is essential that they be supplied with first-class raw material. It is just as impossible for a furniture dealer to make excellent furniture out of decayed worm-eaten lumber, or the manufacturer of "all-wool" goods to make them out of shoddy, as it is for a maker to produce fine cheese or butter from bad milk.

A cheese-maker of several years' experience found to me recently that the officials he found with the milk supplied his locality were:

1. WANT OF AERATION.
2. LACK OF STRAINING.

In the older cheese and butter sections these two are doubtless the points chiefly neglected.

AERATION OF MILK.

Meaning: To aerate milk is to put into it, hence the importance of pure air, where this is done. Not only this, but aeration implies the driving off of gas that may be already in the milk. The cows are most easily driven off while the milk is in the udder, and, for this reason aeration should be done soon after milking and before the milk is cooled.

Importance: The flavor of the cheese and butter largely determines the price. The flavor of these depends, with a competent maker, upon the flavor of the milk. The milk, in turn, depends, to a great extent, upon the flavor of the milk itself, something which governs price dependent upon proper management of milk at the farm. Proper aeration will get rid of objectionable odors that may have caused all this odor or foul. Where paying test is practised, aeration and stirring will prevent the cream from rising, and consequently the milk will give a higher aeration test and one more uniform.

How to Aerate: It may be done by the use of a pump, or by the use of an aerator. An aerator properly used will help, but abused, it is a hindrance. Simply running milk through an aerator once after milking without any further stirring is sufficient. The milk should be stirred two or three times at intervals of 10 to 15 minutes after being put through one of these aerators before going to bed. Not only to prove flavor should this be done, but to prevent the loss of cream in the vats especially in the fall, when the frequently stalling of the milk before being set.

Some keep their milk over night in hanging on nooks. These nooks are fastened to a strong pole or postings supported by a strong beam or beam in the ground.

The morning's milk needs aerating as well as the evening's.

Aerators Should be Kept Clean: Look out for grease and dirt in nooks and crevices. Do not buy an aerator that is not easy to clean. The grain grower who uses a straw for seed does not advise the use of aerators at all, for the reason that patrons do not keep them clean.

A good thing for purifying milk may be made by using an ordinary shallow milk pan made of tin or galvanized iron. The bottom of this, fasten a handle about five feet long. Punch 8 or 10 small holes in the bottom of the pan. In using, put the inverted pan squarely down into the milk and allow this to stir the milk for 10 to 15 minutes. When it ceases bubbling, draw out and then insert again. Do this a dozen times each evening and morning. Evening milk should be treated about the same in the foregoing manner, once immediately after milking, and again 15 minutes and again in about half an hour. Stir it before retiring for the night.

STRAINING.

When to Strain: Straining should begin before commencing to milk, by brushing off all dirt, hairs, straw, etc. on the udder, teats and body of the cow. It is the duty of some one person to brush off the cow with a soft brush, or clean cloth, or the first milk after milking.

How to Strain: An ordinary wire strainer does very well, but we add to it by doubling cheese cloth or thin cotton cloth to have four thicknesses. Lay the cloth over the strainer, and draw it down and fasten it on by means of a tin ring which slips over the cloth and bottom part of the strainer. For quickness we use a strainer that a pall of milk may be put into at one end.

This sits in a wooden frame over the can. Some use a wooden frame, but we use a cloth of some kind is necessary to catch hairs and fine dirt. This cloth must be kept clean. Scald it thoroughly each time after using.

Why Strain? Cheese and butter are made from the milk by being strained. When a great many forget this. They seem to think that it does not make a difference what kind of milk is sent to the factory, judging from what is seen on the strainers of factories. It all goes—we go somewhere, and they do not extract it.

OTHER POINTS TO BE OBSERVED.

1. Keep note but cows that will give least 6,000 pounds of milk or 250 pounds of butter a year. Weed out the poor on the farm from the woman by sending away from the best. Send milk to the factory from none but healthy animals. When a cow shows symptoms of not doing well, it should be separated from the rest of the herd and her milk not used for food.
2. If a cow is sick, or if the milk after milking should not be sent to make either cheese or butter. Not until the fifth day does the milk become normal. Previous to this contains a high percentage of slime, which is of no use to either the cheese or butter-maker, and is a decided hindrance.
3. In the spring and fall, while the cows are in the stable, it should be kept clean. To keep the stable clean the floor should be cleaned as necessary. Two drains in the stable and a house corner; tight floors and plaster for the gutter; lime for sprinkling around the passages; whitewash for ceilings and walls. Let the men throw a little whitewash and a brush for a while from the women. Let the cows go down to the new stable, sweep off the old one and dust that have accumulated there, since the stable was built; whitewash the square feet, and then if it is thought to be a waste of time and labor, don't do any more. Let the men do the whitewashing with the rest of the stable. A cow stable is a place for a cow to live in, not to exist in. The health of men and women depends to a large extent, upon the cow; the health of the cow depends largely on her house more than anything else. Therefore, for the health of children and men depends in a great measure on how the cow stable is looked after. Aim to keep it as clean and pure as the house. In addition, there is need of some kind of method of keeping the cow stable as dry as the house. The cows are in all the time, and somebody must make use of the things mentioned.
4. While in the stable, cow must be muzzling and brushing once a day. If more time is spent in brushing the cows and less in milking, in brushing horses, it will pay better at present.
5. Feed nothing but pure, sweet, clean wholesome food. Anything which gives a taint or bad flavor to milk should not be given to cows. If taint or flavor in the milk comes from the feed, the contrast is the worst when drawn from the cow; if caused by some fermentation, it will grow worse as the milk is kept. The remedy for the latter is cleanliness. Use scalding water

Certain parts of London are centres from

Household.

### Precept and Practice.

[illegible]

## An Association in London Under Fashion

product of a dozen artistic trades, and represents some of the mightiest interests in

all large Canadian towns.

Geo. W. Vanderbilt at Asheville, N.C.

Ellen--I bet you can't guess what Miss

Thomas H. Benton, for thirty years United States senator for Missouri, would not allow the world "Hem," to be printed in the pamphlet copies of his speeches, which he sent to his constituents and other persons. The title page reads: "Speech of Mr. Benton, of Missouri." There was but one Benton.

## Town & Country Callings.

—Corpl. Holmes is temporarily in charge at Qu'Appelle.

—Lord Rosberry's horse, Ladas, has won the English Derby.

—A severe thunderstorm visited Edmonton on Wednesday night.

—The loss by the Fraser River flood is estimated at \$4,000,000.

—Mr. Andros, and wife, File Hills, were in town on Thursday.

—Hydro has cut the Canadian half mile bicycle record to 1:01 3-5.

—Messrs. Russell and J. Boyd, Katespa, were in town on Monday.

—Mr. F. S. Proctor, Fort Qu'Appelle, joined the Masonic excursion to Banff.

—Dr. Bell arrived in town on Tuesday night and left again for Regina on Friday night.

—Mrs. A. McDonald, Fort Qu'Appelle, returned from the east on Friday morning. She was met here by Mr. A. McDonald.

—Mr. Robson, agent of the Mutual Reserve, has been in town for a few days on business connected with his company.

—Mr. J. Patterson, branch manager of the Commercial Union Assurance Co., for Manitoba and the North-West, was in town on Wednesday.

—Mr. Potter, Calgary, arrived on Saturday with a carload of horses for sale. They appear to be a fine lot. For particulars see advertisement in another column.

—Father St. Germain, late of Wood Mountain, after an absence of thirty-five years, is visiting his old home in Montreal. He left Qu'Appelle on Monday morning last.

—Two young gentlemen, Cecil Allen and T. Clare Ward, arrived from England on Saturday morning. The former goes to Mr. Maloney, Fort Qu'Appelle, the latter to St. John's College.

—Mr. Leonard Strong, eldest son of the late Mr. Dundas Strong, of Qu'Appelle, has passed an excellent examination for the Theological College at Lehigh, England, and was to enter it as a resident student at the beginning of the present term.

—The Rev. T. A. Tetelbaum, vicar of Saltsburg, is at present staying in Manchester, and is trying, we understand, to raise funds for his district in the diocese of Qu'Appelle. The extension of the M. and N.W. Railroad to Duck Lake and Prince Albert would probably help that district more than anything else.

—Capt. Richard, and Rev. O. Owens, of Tonawanda, were in town on Thursday to meet Mrs. and Miss Chapman from London, England. Miss Chapman is to assume the position of matron of the Gordon Indian School, at Tonawanda. Mrs. Owens and Mrs. Richard are both daughters of Mrs. Chapman and have been in the country for the last eight years. Mrs. Gordon will resign the matronship of Gordon School in favor of her sister.

—The friends of Mr. and Mrs. J. B. Miliken will regret to hear of the loss they sustained on May 22nd, in the death of their little daughter Gladys. Death was caused by a small insect known as a wood tick, which made its way through the child's ear into the back part of the head, where it effected the spinal column. Mr. Miliken moved from here to Clinton, B.C., nearly two years ago, and we are sorry to learn has during that time met with his full share of adversity.

—A rather curious accident happened at Edgely Farm on Friday afternoon. A cow of this farm of the country rather violent and storm, accompanied with rain, came on during the afternoon, and one of the employees, when running for shelter, came in contact with the roof of an ancient shanty, which was taking a voyage on its own account, and was knocked senseless. Dr. Cartwright was summoned from town but his services were scarcely required. Nothing serious has resulted.

—A terrible accident occurred on the C.P.R. at Mattawan, on Saturday last. The Pacific express, composed of the mail, express, baggage, and first class, dining and two sleeping cars, went through a burning bridge. The engine and tender made a fearful plunge into the river twenty-five feet below, where they now are submerged, with the exception of a small portion of the smokestack and tank. The mail and express, baggage, and first class cars followed, piling themselves in one great heap, and then turning over and settling down into the river. Almost immediately the cars took fire and were consumed rapidly to the water's edge. It is a matter of surprise that all were not killed. The engineer and fireman escaped. Two passengers are known to have been killed, and others are missing.

—Messrs. W. and J. Hicks, Davin, were in town on Tuesday.

—The Kickapoo Indian Medicine Company will be in the Town Hall, Qu'Appelle, for a fortnight from the 18th inst.

—Dr. Henderson, as will be seen from our advertising columns, has opened an office in town (next door to Beauchamp's store).

—At the last meeting of the St. Peter's Women's Guild, Mrs. Burn was elected president and Mrs. Thompson vice-president.

—Mr. W. H. Bell is offering sixty mares for sale or in exchange for stock. They are a good lot, weighing from 1000 to 1200 lbs. each.

—Rev. J. K. Welsh, of Indian Head, preached on Sunday last, morning and evening, in the Presbyterian Church. Sacrament was administered in the morning.

—The well known knight of the grip, Mr. Frank News, and his bride, who are on their honeymoon trip, were in town on Wednesday, and drove out to Fort Qu'Appelle to visit Mr. Zinkan, the bride's father.

—During the absence of Inspector Constantine, which is likely to extend over six months, Staff Sergeant Effe will assume his duties. This will entail his removal to Moosomin, his family will, however, remain here.

—Mr. A. T. Robinson, Baptist student, from Manitoba College, conducted services in McLean's Hall on Sunday last. He will minister to the spiritual needs of the Baptist congregation during the summer.

—Mr. W. Henley and his gang of workmen have made good progress in the filling-in work for the new station. They will be through in a day or two, and the erection will be commenced as soon as they have completed their work.

## INDIAN HEAD.

The Cricket Club ball takes place on Tuesday, June 19th.

Geo. Davidson, C.P.R. night operator, is down with inflammatory rheumatism.

The charges of the staff on the Experimental Farm have been directed during the past week towards road-making and plowing under tumble weed.

Thanks to genial showers of the past few days the young wheat plant is flourishing—so is the tumble weed.

General Superintendent Whyte and Major Bell, of the Bell Farm, are reported to be doing the Robinson Cruise act in some portion of the flooded district of British Columbia. At all events, the major is not home yet.

Some eye on the Experimental Farm only six inches high is already in head.

Rev. J. K. Welsh exchanged pulpits with Rev. J. McAllister, of Qu'Appelle Presbyterian Mission, last Sunday. The latter gentleman delivered two robust discourses.

Dr. Kemp is about to commence the erection of a building primarily as a residence but a portion of which will be utilized as a laying-in infirmary. An operating room, nurses room, and ward will be set apart at the start and these added to as the institution develops.

Preparation is being made for the event of the season—the ball to be given in the Town Hall, on Tuesday evening, June 19th, under the auspices of the Indian Head Cricket Club. Particulars having been advertised, it remains but to add that the members of the C.C. will spare no effort to make the dance enjoyable, and, as many visitors from a distance have promised to be present, there will be an unusually large attendance.

Salmon and Indian Head met on the diamond last Saturday. Winning the choice, Salmon went to the bat, scoring one in the first innings. The home team answered with nine, and it soon became evident that the latter had things all its own way. At the close of the first half of the sixth innings the score stood 30 to 10 in favor of Indian Head, and play was discontinued. Dickson and Parkin made a strong battery. A fly catch off third base by Geo. Davidson called for merited applause. At the conclusion of the game, the players adjourned to the Assiniboine House, where Mr. A. McIntosh had outdone the reputation of the house. The culinary preparations were perfect, and all present thoroughly enjoyed the good things placed before them.

The following are the teams:—Indian Head: F. Parkin (Capt.), A. Dickson, M. Robinson, W. Stirling, G. Davidson, J. Brooks, J. Wray, O. Edwards, C. F. Wood. Salmon: H. Bonycastle (Capt.), J. O. Kinson, W. Groven, J. Bonycastle, G. Ferguson, J. Gillespie, J. Hamilton.

Hotel arrivals.—Commercial: J. Ranton, J. C. Gillespie, Miss L. Burton, E. S. Thomas, Winnipeg; Arch. Balfour, Balcarres; Pierre Fournin, H. Gynelle, A. Gynelle, Hayman, S. Sattelle, Montmartre; W. Holden, W. R. Chadrin, Regina; L. McKee, Moosomin; F. Jones, Moose Jaw; H. H. Rordans, Toronto.

## A Gentle Reminder.

Now that the Print and Muslin Season is at hand, we would call your attention to our

Fast Color Prints

at 10c. and 12½c. per yard, and also our

Washing Dress

Muslins

at 10c. per yard. To see them is to buy them, and the sooner you see them the better choice you will have.

J. P. Beauchamp.

CONSERVATIVE MEETING.

There was a meeting of the South Qu'Appelle Liberal-Conservative Association in the Court Room, Qu'Appelle, on Saturday, the 8th inst.

Mr. Wm. Henley, president, in the chair. It was moved by J. H. McCall, seconded by H. F. Boyce, that Messrs. T. Johnston, H. B. Turner and W. Harvey, be admitted members. Carried.

The following delegates were appointed to attend the meeting of the Central Liberal-Conservative Association, to be held at Fort Qu'Appelle on Tuesday, 14th June:—G. S. Davidson, J. P. Beauchamp, A. Raymond, H. F. Boyce, B. Harvey, J. P. Creamer, W. S. Redpath, A. Webster, J. H. MacCauley, A. D. Dickson and W. Henley.

Moved by A. E. Whiffin, seconded by J. H. MacCauley, that the delegates appointed to attend the meeting at Fort Qu'Appelle be also appointed to attend the meeting of the South Qu'Appelle Central Association, to be held at Indian Head on June 19th. Carried.

Moved by J. H. MacCauley, seconded by G. S. Davidson, that this association furnish free transportation between here and Fort Qu'Appelle for such delegates from other associations as may come to Qu'Appelle Station, and that the secretary be instructed to arrange for such transportation. Carried.

Meeting then adjourned sine die.

HOTEL ARRIVALS.

LELAND.

J. Ranton, D. Mackenzie, J. Slater, Mr. J. A. McDonald and friend, J. C. Gillespie, E. L. Thomas, F. R. Nease and wife, Winnipeg; R. S. Morton and wife, Toronto; J. B. McEwen, L. A. Zafelt, Ottawa; J. Andros and wife, File Hills; Arch. McDonald and wife, Fort Qu'Appelle; Mrs. and Miss Chapman, London, Eng.; Chas. Howson, Dr. Cowan, Regina, Isaac Potter, High River; R. McLennan, Montreal.

QUEEN'S.

H. A. Rordans, Broadview; Cecil Allen, Malvern, England; T. Clare Ward, England; W. Old, Carberry; J. Boyd, Abernethy; R. Barwell, Saltoun; E. Arnold, Battle Creek, Michigan.

BIRTH.

Styx.—On the 8th inst., at Qu'Appelle, the wife of A. J. Elve, of a son.

ASTRAY.

CAME on my premises about the 1st of May, a red and white calf with white stripes down the back and hind feet white. Owners are requested to move property, pay expenses and take it away.

A. J. ELVE.

\$5 REWARD

For information as to the whereabouts of three ponies, Pinto Mare, 4 legs white. Black Horse, streak on nose and near hind hoof white. Bay Mare, heavy in coat, streak on nose and off hind foot white.

THOMAS SKINNER & SONS, Katespa, June 4th, 1894.

NOTICE.

ATTENTION is directed to the fact that there is a PUBLIC NUISANCE created by the only proper place to deposit rubbish, etc. Persons found depositing rubbish in any other than the above mentioned place render themselves liable to prosecution.

By Order, A. RAYMOND, Councilor.

NOTICE.

POTTER has just arrived at Qu'Appelle with a car load of HORSES and MARES, Clydes bred to Montana and Oregon mares; weight from 1100 to 1300; young and well broken. Will either sell for cash, or trade for Cattle, Hogs or Sheep. L. Potter can be seen on application at the Leland Hotel.

35-37

## AUCTION SALE.

I AM authorized to sell by Auction at my stables, in rear of Queen's Hotel, at 2 o'clock, p.m., on June 22nd, 1894, one pair of general purpose MARES (one black and one roan). C. BOOTH, G. S. Davidson, auctioneer.

35-36

NOTICE.

PERSONS requiring first class CABBAGE and CAULIFLOWER PLANTS would do well to call on H. MITCHELL.

33-35

LOST.

SORREL HORSE, white hind feet, white stripes on face, four years old. Last seen at Mr. J. Whittington's, about the middle of April. Any person giving such information as will lead to the recovery of the same will be suitably rewarded.

W. U. BELL.

A BARGAIN.
